## EDUCATION

### Master of Project Management

Queensland University of Technology ·  
Dean's Award, 7.0 GPA

### Bachelor of Systems Engineering

Universidad de Lima, Peru

### PMP (2012)

Project Management Institute

### Certified ScrumMaster (CSM)

Scrum Alliance

## PROFILE

Program Analyst with 15+ years supporting and running large-scale program delivery, including hands-on ownership of budgets, schedules, dependencies, risk, and reporting across financial services and cloud SaaS environments. Builds the dashboards, forecasts, and reporting artefacts that give program managers and stakeholders a clear, data-driven picture of progress. Highly proficient in the Atlassian suite (Jira, Jira Analytics, Confluence), with a strong analytical background writing production SQL and building self-service reporting tools. Comfortable working across PMP and Scrum delivery frameworks in complex environments.

## EXPERIENCE

### Xero

Mar 2022 — Present

#### Lead Technical Program Manager

Brisbane (remote) · Global cloud accounting software platform, 4,500+ employees

- Personally built automated reporting dashboards (Lead Time for Changes and other DORA metrics) using self-written SQL, giving engineering leaders a data-driven view of delivery performance.
- Launched a Xero-wide Jira optimisation initiative, including a division-wide Jira Data Quality Score, turning inconsistent reporting into a reliable, organisation-wide data source.
- Built the Unified Burndown, a single integrated schedule tracking cross-domain migration plans, owners, statuses, and quarters across every major engineering division - the artefact leadership uses to track and report progress.
- Manage risk, issue, and dependency tracking across a federated program spanning dozens of engineering teams, with structured reporting to GM and EGM-level stakeholders.
- Maintain documentation and information management standards across Confluence and Miro, keeping delivery records and onboarding material in sync for future teams.

### Suncorp Group

Nov 2019 — Nov 2020

#### Delivery Coach

Brisbane, AU · ASX-listed financial services and insurance, highly regulated

- Supported delivery of a large-scale telephony and data platform migration across the entire organisation and its affiliate brands, coordinating four engineering teams including offshore contractors.
- Verified technical solutions met data governance and compliance standards, identifying and escalating data risks on a compliance-critical migration.
- Introduced dependency management, cross-team communication, and visual progress reporting frameworks used across the program.
- Worked directly with Infrastructure, Security, Business Units, and external vendors, coordinating requirements and compliance across all parties.

## EXPERIENCE (CONTINUED)

---

### Go1

Nov 2020 — Mar 2022

#### Technical Program Manager

Brisbane, AU · Global e-learning SaaS platform, hyper-growth scale-up

- Owned the full delivery lifecycle from discovery through production: scoped MVPs, managed technical trade-offs, ran planning and backlog refinement, coordinated releases.
- Established a common operating system and reporting cadence that increased delivery pace and gave stakeholders confidence in progress and predictability.
- Managed complex cross-team dependencies, keeping engineering, product, data, and marketing aligned through structured coordination.

### Virgin Australia

Jun 2019 — Nov 2019

#### Enterprise Agile Coach

Brisbane, AU (consulting via Neu21) · Aviation, large regulated enterprise

- Facilitated creation of a single product backlog and physical Kanban boards for end-to-end visibility of all work in flight across squads.
- Led quarterly planning workshops with 70+ people across digital delivery, surfacing technical dependencies and coordinating stakeholder input early.
- Introduced a value-vs-effort prioritisation framework giving Product Owners an objective basis for balancing competing stakeholder demands.

### intelliHR

Feb 2018 — Jun 2019

#### Head of Product

Brisbane, AU · HR SaaS, growth-stage startup

- Facilitated executive and board-level strategy workshops using the Blue Ocean Framework, coordinating input across senior stakeholders.
- Introduced behavioural analytics (Pendo, FullStory) to shift decisions from assumption-driven to evidence-driven, tracking adoption and feature performance.

**Iteration Manager at Console Group / Reapit (Feb 2017 - Feb 2018)**, coordinating a cross-functional team delivering a new payments capability with a deep external provider integration. // **Projects Lead at 2sol Software Studios (Nov 2012 - Jan 2017)**, primary delivery partner to Flight Centre Travel Group - managed a team of 5 developers across a \$5M+ monthly revenue hotel and accommodation booking platform. // **Systems Architect and Software Engineer at Emedia Campaigns (Feb 2006 - Jul 2012)**, writing and optimising production SQL powering high-availability ticketing, booking, and payment systems for major events. // Earlier software engineering roles in Canada and Peru (2003 - 2006).
