Award · 7.0 GPA

Bachelor of Systems Engineering

Universidad de Lima, Peru · 1998–2002

Certified ScrumMaster (CSM)

Scrum Alliance · 2012

PMP-trained

Project Management Institute · 2012

PROFILE

Technical Program Manager with 15+ years delivering complex ICT and business transformation programmes across regulated enterprise and high-growth technology environments. Strong track record in end-to-end program governance, executive stakeholder engagement, and establishing the operating models that keep large, multi-team programmes predictable and on track. Experienced leading cross-functional teams at scale, influencing at GM and EGM level, and shaping governance structures that give senior leaders clear visibility of milestones, risks, and outcomes.

EXPERIENCE

Xero

Mar 2022 – Present

Lead Technical Programme Manager

Brisbane (remote) · Global cloud accounting software · 4,500+ employees. Leading the company-wide API Programme – a high-profile initiative to deliver a single federated API surface across all product capabilities, spanning virtually every engineering team at Xero. Previously led AI for Customers and US Bills Integration.

- Own end-to-end programme governance, roadmaps, and delivery tracking across dozens of engineering teams, reporting milestones, risks, and trade-offs to EGM-level leadership.
- Established a company-wide ways-of-working programme to standardise how all teams plan and deliver, giving executives a common view of portfolio health and what needs attention.
- Kept 12+ engineering teams aligned across technical and go-to-market dependencies in the Accounting Businesses division, managing a complex web of cross-functional dependencies.
- Coached engineering managers and tech leads across 10+ teams on delivery governance, capacity planning, and forecasting – improving predictability across the programme.
- Led delivery of AI for Customers, embedding AI capabilities into core products used by over 3 million customers, coordinating ML engineers, data scientists, and product teams across multiple business units.

Go1

Nov 2020 – Mar 2022

Technical Programme Manager

Brisbane, AU · Global e-learning SaaS platform. Led a cross-functional squad of 8 end-to-end – team lead and Scrum Master – from discovery through production on a new content-creator product.

- Established a common operating system and delivery governance framework from scratch, increasing pace of delivery and giving stakeholders confidence in quality and predictability.
- Managed complex dependencies across distributed teams, keeping engineering, product, data, and marketing aligned through structured coordination and clear reporting.
- Owned the full delivery lifecycle: scoped MVPs, managed technical trade-offs, ran planning and backlog refinement, coordinated releases end-to-end.

Suncorp Group

Nov 2019 – Nov 2020

Delivery Coach

Brisbane, AU · ASX-listed financial services and insurance (regulated enterprise). Embedded in the Data Engineering area, managing delivery of a large-scale telephony and data platform migration across the entire Suncorp organisation and all affiliate brands.

- Coordinated four engineering teams including offshore contractors, partnering with Infrastructure, Security, Business units, and external vendors through a compliance-critical programme.
- Introduced delivery governance frameworks – dependency management, cross-team communication patterns, visual progress reporting, and delivery rhythms – that gave leadership reliable visibility of status and risk.
- Kept the programme on track through COVID-19, corporate restructuring, and a shifting regulatory environment, meeting aggressive goals within limited timeframes.

Virgin Australia (consulting through Neu21)

Jun 2019 – Nov 2019

Enterprise Agile Coach

Brisbane, AU · Aviation, large regulated enterprise.

- Coached four Product Owners and led quarterly planning workshops with 70+ people across digital delivery, surfacing technical dependencies early and building cross-team alignment.
- Facilitated creation of a single product backlog and visual Kanban boards giving the programme end-to-end visibility of all work in flight.
- Delivered measurable improvement in delivery performance across all products in scope within a 5-month engagement.

intelliHR

Feb 2018 – Jun 2019

Head of Product

Brisbane, AU · HR SaaS startup.

- Built the product management function from scratch – directly managed a team of 5 (3 PMs, 1 designer, 1 data engineer), establishing discovery rhythms, roadmapping, and prioritisation frameworks.
- Facilitated board-level strategy workshops using the Blue Ocean Framework, advising executives and investors on product direction and strategy.

2sol Software Studios

Nov 2012 – Jan 2017

Projects Lead

Brisbane, AU · Primary engineering partner to Flight Centre Travel Group.

- Owned end-to-end delivery of Flight Centre's online hotel and accommodation booking platform, a core digital business generating over \$5M in monthly revenue, working directly with senior Flight Centre stakeholders.
- Led a team of 5 developers across a multi-product ecosystem of 10+ customer-facing products and 20+ APIs, balancing operational health with new-feature delivery.
- Ran a multi-year practice transformation – from reactive delivery to a governed, predictable programme with CI/CD, structured operating rhythms, and delivery metrics.

Emedia Campaigns

Feb 2006 – Jul 2012

Systems Architect / Software Engineer

Brisbane, AU

- Designed and maintained high-availability ticketing, booking, and payment architecture for major events, including V8 Supercars, Byron Bay Blues Festival, and Bridge to Brisbane.
